

## CT-936 Soldering Station

### ESD & Non ESD Soldiering Station

#### Fatures:

- Adopts advanced temp-controlled circuit, easy to adjust temperature and control temperature accurately
- Adopts Japanese heater, heating up rapidly with a long life span
- Slim handle design, avoids fatigue out of a long time use
- The connection wire to the handle is made of silica gel, which is soft, heat resistant and wearable
- Easy to replace tips
- Normal style and ESD style are available

Input Voltage	AC 220V (110V)
Power	60W(MAX)
Output Voltage	24VAC
Range of Temperature	200~480 <sup>0</sup> C
Stability of Temperature	/- 2 <sup>0</sup> C
