FLUID 101

AGAINST PENETRATING MOISTURE

Costly interruptions to the manufacturing process due to short circuits in the electrical circuitry caused by condensation and humidity, are now a thing of the past, thanks to FLUID 101.

FEATURES	APPLICATIONS
<ul style="list-style-type: none"> • A dewatering fluid with extremely fast moisture displacement properties. • High water-repellent and anti-corrosive properties. • Low surface tension. • Can get into hard-to-reach areas and act there without requiring disassembling of equipment, due to its marked capillary activity. • Promptly eliminates leakage currents and short circuits and prevents their recurrence. • FLUID 101 does not emulsify in water. 	<ul style="list-style-type: none"> • Can be used wherever moisture causes damage, to restore electrical equipment. • Covers all the parts that need protection with a thin protective film which does not interfere with subsequent processing. • Can be used to protect electrical and electronic systems wherever moisture presents a threat. • To remove water out of antenna amplifiers.

Color :	amber
Film thickness :	0,3µm
Coverage :	150 m²/l
Drying time : (solvents)	20-30 min. (20 °C)
