

	<p><b>SR-073 SMD REWORK STATION</b></p> <p>Size: 24.5(0) x 18.5 (W) x 13.5(H)</p> <p><b>Features</b></p> <ul style="list-style-type: none"> <li>★ Economy Power, heating time, low noise and price saving.</li> <li>★ Auto standby function</li> <li>★ Digital display</li> <li>★ Ideal for Recharging electronic equipment smartphone, ipad, etc ...</li> </ul>
---	--

Combined powerful suction tin gun and high-performance soldering for optimal repair works.

### Usage

1.Rework for a variety of components such as: SOIC, CHIP, QFP, PLCC, BGA, etc.  
(Especially for phone cable and welding cable split seat)

2.For shrink, drying, paint, adhesive removal, thawing, warm, and plastic welding.

### Model No: SR-073

- High-precision thermocouple testing the temperature and keep the temperature. Dual operational amplifier logic control to ensure work stability. Design of anti-static desoldering components to avoid static damage.
- Using pump type that life are long and noise are small. High-quality heating element in the same power efficiency can be doubled effect, good for extend the heating element working life and power savings. It is the real lead-free soldering.
- Air gun also set humanized manually and automatic conversion. Automatic, handle is equipped with automatic sensor switch. When take the gun handle that system can quickly enter the working mode. When put the handle on the holder that System will enter standby mode. Manually, when the air gun has been is working condition, the working environment for all kinds of real-time operating convenience.
