

TTP223B Digital Touch Sensor Capacitive Touch Switch Module For Arduino

**Description:**

This module is capacitive type jog mode touch switch module that is based on a touch detection IC (TTP223B). Allows you to remove the worry of conventional push-type keys.

Specifications:

- 1.Touch surface size: 1.4 * 1.4cm
- 2.Modes: jog, self-locking
- 3.Supply voltage: 2.5-5.5V
- 4.Penetration distance: about 5mm (non-metallic)
- 5.Compatible with all types of single chip
- 6.This is suitable for all kinds of control system, robot, intelligent vehicle, etc.

NOTE: The power supply must be stabilized and the negative pole must be well grounded
