WATERPROOF CONJOINT

3 WAY

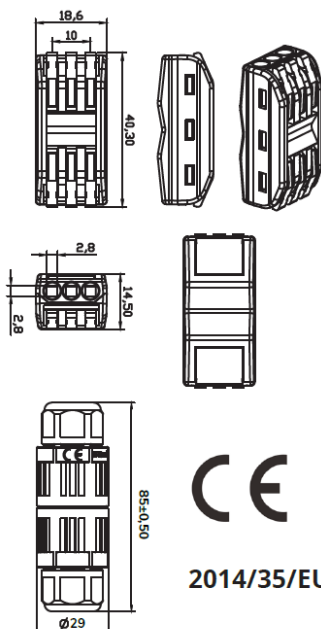

IP68 waterproof electrical cable wire connector.

No screwdriver needed to connect your wires.

The orange, yellow and blue levers act as clamp to keep wires in firmly locked in place for dependable connections.

Ideal for exterior light fittings and circuits, as well as areas exposed to moisture or water.

Technical Data

Product code:	401040
Description:	CDF 200 Waterproof connector 3 way
Rated voltage:	400 V
Rated current:	32A
Main wiring:	From 12AWG down to 28 AWG
Rated Temperature:	85 °C
Material:	Nylon plastic, copper and 304 stainless steel

For use of

Solid wire:	0.08 mm ² – 4.0 mm ²
Stranded wire:	0.08 mm – 2.5 mm ²
Strip Length:	9 – 10 mm

Instructions

1. Strip wire to 9 -10 mm.
2. Unscrew the outer casing and loosen the cable nuts.
3. Insert wire to connect.
4. Move lever to the open position (in 90° angle).
5. Push in wire and move lever back into closed position.
6. Screw the outer casing tightly to create a watertight seal.
7. Tighten the cable nuts to secure the wire connections.
