

3-6V Dual Axis Gear Motor with 65mm Rubber Wheel

Model: AC032 / 160004

Description: This product is 1 DC gear motor + 1 wheel = 1 set. The wheels and the motor are molded by injection molding. Wheels diameter 65mm width 27mm. Motor gearbox two-axis motor with a reduction ratio of 1:48

Specification:

Working voltage	3-6V
Reduction gear ratio	1:48
RPM	230
Diameter of wheel	65mm
Wide of wheel	27mm

Features:

This is DC gear motor and the torque is large, the current is low and it is suitable for battery applications. Widely used in smart car, boat mode.
