Ks0042 keyestudio MQ-4 Gas Sensor

Introduction:

MQ-4 can be used in household and industrial-level gas leakage detection device to detect natural gas and methane. It is featured with wide detection range, high sensitivity, fast response and recovery time, with excellent stability, long service life and simple drive circuit.

Applicable gas: natural gas, methane

Specification:

Operating voltage: 5V

Output signal: Analog

Wide detecting scope

Quick response and High sensitivity
