# Ks0062 keyestudio I2C LCD2004 Module

Introduction:

keyestudio 2004 I2C Module is a 20 character by 4 line LCD display with Blue background and White backlight. The original 2004 LCD needs 7 IO ports to be up and running, ours is built with Arduino IIC/I2C interface, saving you 5 IO ports. This LCD is ready-to-use because it is compatible with the Arduino Liquid Crystal Library. LCDs are great for printing data and showing values. Adding an LCD to your project will make it super portable.

Specification:

Input voltage: DC 5V

Control signal: I2C

Address:0x27
