Ks0277 keyestudio FTDI Basic Program Downloader USB to TTLFT232
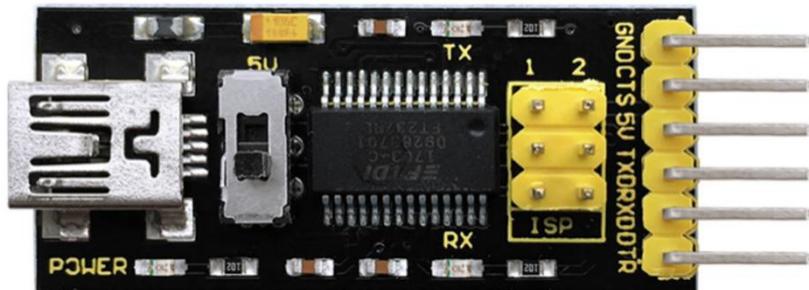

Introduction:

With the development of computer technology, parallel port and serial port on the PC slowly disappeared, and now even the desktop are few parallel.   But for engineers, parallel port and serial port are essential interfaces, especially the serial port. For those computers without serial port, the most convenient solution is to use a USB to serial chip to virtual a serial port out.   Many manufacturers have the production of such chips, such as the CP210x series of Silicon LABS, TI's TUSB3410, CH34x series of Nanjing Qinheng, FT232 series of FTDI, Prolific's PL230x series, Echo's ARK3116 and so on.

Specification:

Supply Voltage: 3.3~5V
Current：>10mA
Interface: RS232
