## KS0355 keyestudio HC-08 Bluetooth Module

### Introduction:

Keyestudio HC-08 Bluetooth module is a new digital transmission module, based on the Bluetooth Specification V4.0 BLE Bluetooth protocol. Its wireless working frequency band is 2.4GHz ISM, and the modulation method is GFSK. The module's default transmit power is 4dBm. Receive sensitivity -93dBm. The module is compatible with both Android and Apple systems. In an open environment, it can communicate with iPhone 4s, to achieve ultra-long-distance communication of 80 meters. It also comes with an LED status indicator. When using, you can directly see the connection state of Bluetooth.

### Specification:

Supply Voltage: 5V

Current: 21mA

Interface: SPI
