

COAXIAL CABLE – RG59

RG59 is a versatile coaxial cable with a characteristic impedance of 75 ohms, designed for general-purpose use.

It is suitable for indoor, outdoor, or underground applications. RG59 can effectively transmit baseband signals, broadcast frequencies, and audio and video signals over distances up to 100 feet. However, its relatively poor performance in high-frequency signal attenuation limits its use over longer distances for applications like broadband internet and high-definition TV signals.

The cable is noted for its flexibility and ease of handling. The "U" sometimes seen after the RG59 designation indicates that it is a general-purpose coaxial cable.

- IDEAL FOR VIDEO / CCTV / RF
- SUITABLE FOR SOME ANTENNAE
- SUITABLE FOR HIGH VOLTAGES (2KV)

SPECIFICATIONS	
CONSTRUCTION TYPE	COAXIAL
IMPEDANCE	75 OHMS
DIAMETER	6mm
MAX OPERATING VOLTAGE	2KV
CENTRE CONDUCTOR	SOLID COPPER (NOT copper-clad steel)
INSULATION	SOLID WHITE PE
SHIELD	COPPER BRAID
OUTER JACKET	PVC SHEETING
CONNECTOR COMPATIBILITY	BNC
EQUIVALENT CABLE	RG6 RG6 is ideal for longer runs and higher frequencies
