

**Specification:**

Color: red

Material: electronic components

Length: 10cm

Width: 8.5cm

Height: 3cm

Chip selection: TPA3116D2 \* 2

Supply voltage: DC12-24V

Output power: 200W

Signal to noise ratio: 100db

Number of sound channels: 3

Switching frequency: 1.2MHZ

**Feature:**

The amplifier board uses TPA3116D2 chip as core which is a high-performance digital power amplifier chip.

Wide voltage power supply from 12V to 24V DC, energy saving design, the efficiency is high.

You can adjust the volume by themselves easily.

**Package includes:**

1Set x XH-M139 2.1 Channel Digital Amplifier Board 12V-24V TPA3116D2 (2 \* 50W + 100W \* 1)

1Lot x Accessories
