

18650 Lithium battery 1200mAh 3.7V

P/N:240430

Battery type: 18650 cylindrical lithium-ion battery, rated voltage 3.7V, with protective plate and lead out wire (red and black wires).

Applicable scenarios: Small portable/mobile power supply devices such as electric two wheelers, electric toys, electronic devices, etc.

Technical Data:

Storage temperature: 15-37 ° C

Brand: XWD

Protection function: overcharge protection

Scope of use: Power storage class

Chemical type: ternary

Charging working temperature: 25-37 ° C

Discharge working temperature: 25-30 ° C

Product Certification: Korean certification

Standard capacity 1200mAh

Discharge rate: 3C

Weight: 400g
