

KE0064 KEYES MQ-135 air quality sensor module

Parameters:

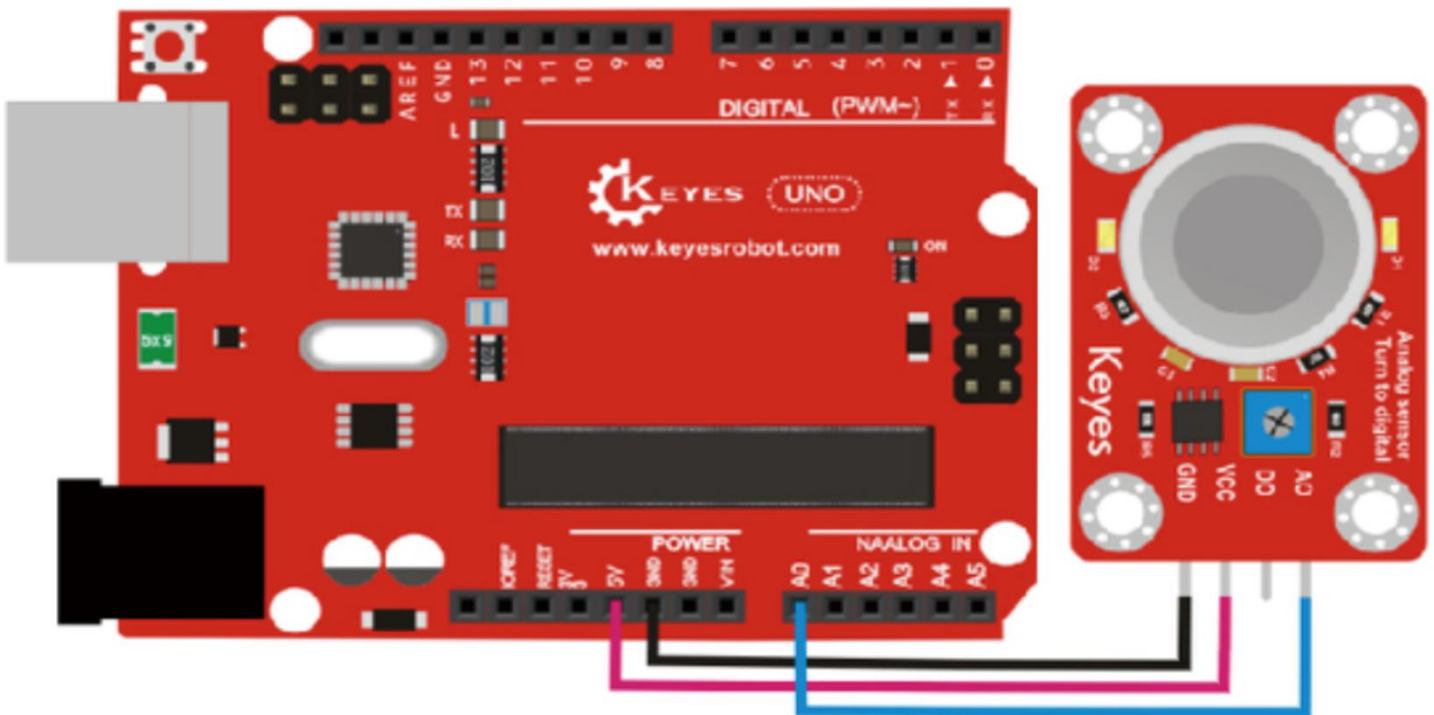

Working Voltage: 5VDC

Colour: Red

Size: 45x25x19mm.

PINOUT Instruction:

Shenzhen Keyi Interactive Robot Co., Ltd.

Sample Code:

```
/*
  AnalogReadSerial
  Reads an analog input on pin 0, prints the result to the serial monitor
  This example code is in the public domain.
  */
void setup() {
  Serial.begin(9600);
}
void loop() {
  int sensorValue = analogRead(A0);
  Wiring well and uploading the code above, open the serial monitor of Arduino software.
}
```

Result:

Turn on Serial monitor to check the pollution index of the air surrounds you:
