Ks0023 keyestudio 18B20 Temperature Sensor

Introduction:

DS18B20 is a digital temperature sensor. It can be used to quantify environmental temperature testing. The temperature range is $-55 \sim +125^{\circ}\text{C}$, inherent temperature resolution 0.5°C . It also support multi-point mesh networking.

The DS18B20 can be deployed to achieve multi-point temperature measurement. It has a 9-12 bit serial output.

Specification:

Supply Voltage: 3.3V to 5V

Temperature range: -55°C to $+125^{\circ}\text{C}$

Interface: Digital
