## Ks0050 keyestudio Line Tracking Sensor

### Introduction:

This Line Tracking Sensor can detect white lines in black and black lines in white. The single line-tracking signal provides a stable output signal TTL for a more accurate and more stable line.

Multi-channel option can be easily achieved by installing required line-tracking robot sensors.

### Specification:

Power supply: +5V

Operating current: <10mA

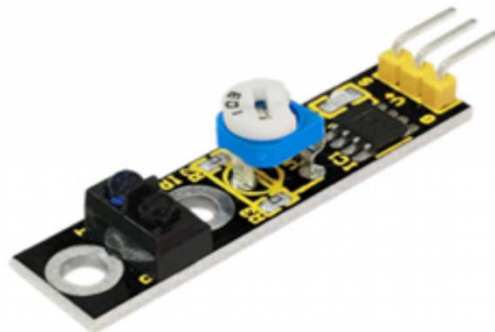

Operating temperature range: 0°C ~ + 50°C

Output interface: 3-PIN (1 - signal ; 2 - power ; 3 - power supply negative)

Output Level: TTL level
