

## KS0405 Keyestudio BMP280 Module (Black and Eco-friendly)

### Introduction:

The keyestudio BMP280 module mainly uses the BMP280 sensor, a temperature and air pressure sensor, which is an absolute air pressure sensor designed for mobile applications.

The sensor module is available in an extremely compact package with small size and low power consumption. It features proven piezoresistive pressure sensor technology with high accuracy and linearity, as well as long-term stability and high EMC robustness. The multiple device working options provide the ultimate flexibility; we can optimize the device in terms of power consumption, resolution and filtering performance.

### Specification:

Supply Voltage: 5V  
Current: max >5mA  
Interface: I2C
