

Change Over Switch

LW26-16 FDW-OFF-REV

LW26-16

Application

The LW26 series rotary switch mainly applies to 440V and below, AC 50Hz or 240V and below DC circuits. For breaking and closing, change-over of circuits under infrequently manual operation. And the typical application are: control switch of 3 phase motors, control switch of switch gear, control switch of instruments, and change-over switch of machinery and welding machine.

The series comply with the GB 14048.3, GB 14048.5 and IEC 60947-3, IEC 60947-5-1. The LW26 series rotary switch has two derivatives: LW26GS Pad-lock type and LW26SKey-lock type. Both of them are applicable in circuits when a physical control is required.

Working Conditions

- (1) Ambient temperature DO NOT exceed 40 °C . and the average temperature, measured over a period of 24 hours. DO NOT exceed 35°C.
- (2) Ambient temperature should not be below -25°C.
- (3) Should not be installed above 2000m above sea level.
- (4) The humidity should not exceed 50% when the ambient temperature is 40 °C and higher humidity is allowed for lower temperature.

Re1: Neutral

Re2: The power under: AC-23 A, AC-3, AC-4 are in three phase three poles, and the denominator represents the power under single phase two poles.

Mechanical Life

Mechanical life without load: 0.1×10^6 times, operation frequency is 120 times/h

Mechanical life with load: 0.03×10^6 times operation frequency is 120 times/h
