

12V / 24V DC Permanent Magnet Alternator Wind Turbine Generator 100W

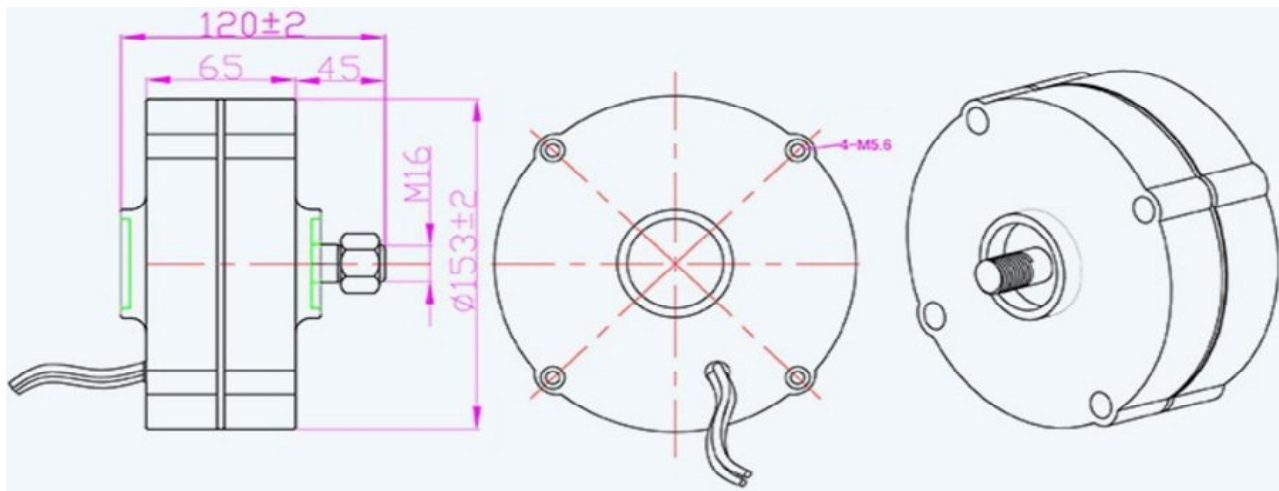

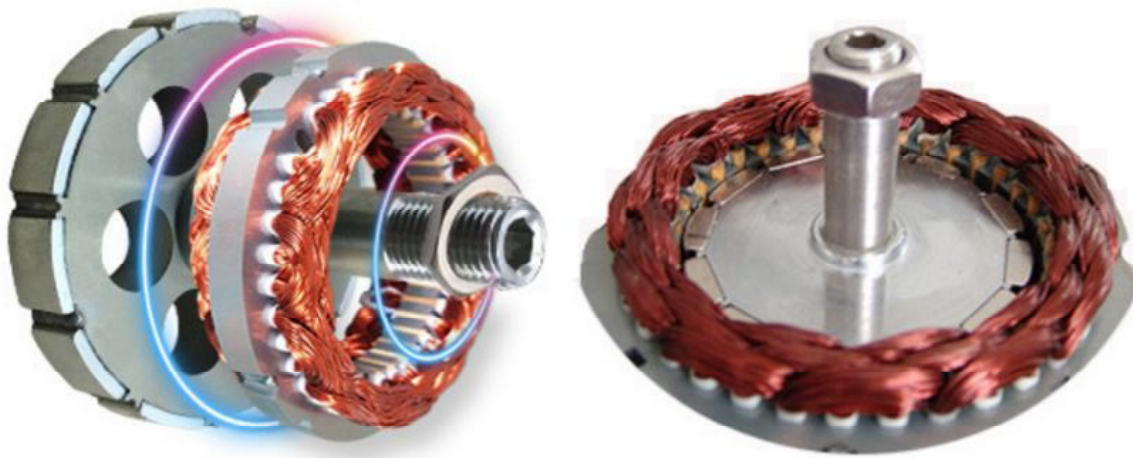

Model: NE-100

- Features:**
1. Using neodymium iron boron, high grade copper wire winding, power efficient and stable
 2. Special stator and rotor design, start resistance torque is small, and good heat dissipation
 3. No gear, direct drive, low speed rare earth permanent magnet generator, easy to operate, safe and easy to maintain
 4. Die-cast aluminum alloy shell, anti-corrosion treatment, acid and alkali, salt erosion

Parameter:

Model	: NE-100
Rated power	: 100W
Maximum power	: 130W
Rated voltage	: 12/24V
Rated speed	: 750rpm
Rated frequency	: 50Hz
Net weight	: 3.5kg
Size(HxDia)	: 65x 145mm
Shaft length)	: 28mm
lubricating	: Fill grease
Ingress Protection	: IP54
Motor	: Three-phase permanent magnet synchronous alternator
Operating temperature	: -40~80°C
Life expectancy	: >20 years

A : 660mm
 B : \varnothing 1150mm
