Sonoff Smart Home Solution

Home automation is "The Internet of Things". The way that all of our devices and appliances will be networked together to provide users with a seamless control over their home equipment.

Sonoff is a cost effective, smart home solution which is designed and produced by ITEAD. It is a low-cost solution that helps you to step into the amazing smart home. Sonoff smart home series are based on WiFi that can connect to appliances of different types and brands. Sonoff transmits data to a cloud platform through the WiFi router, which enables customers to remotely control all the connected appliances, via the iOS/ Android mobile application eWeLink. eWeLink server is Amazon AWS global server.

ITEAD smart home solution makes all your home appliances smart, as long as your phone has network, you can remotely control your appliances from anywhere at any time. And by setting different timing schedules for your appliances, you can maintain a carefree life

Different Sonoff versions have different features. But have some basic features in common:

- Remote turn on/off devices
- Track devices status
- Device status timely feedback to the APP
- Set single/repeat/countdown timing schedules
- One-key sharing device

Read [ITEAD Smart Home User Guide](#) to get start using ITEAD smart home device.

Please scan below QR code to download the APP eWeLink iOS latest version in Apple App Store or Android version in Google Play.
