

TYPICAL APPLICATIONS

THERMOFIGHT FR/707/HI RESIN SYSTEM

UNIQUE PROPERTIES:

- * good thermocycling properties
- * excellent electrical properties
- * very low shrinkage
- * high flexibility, very low embedment stress
- * re-enterable
- * non-flammable / flame retardant

TYPICAL APPLICATIONS INCLUDE :

- Encapsulation of electronic components,
- Cables joints operating under adverse environmental conditions,
i.e. high humidity, low temperatures,
- Where flame retardancy is required
- And where re-enterability of the resin system is required.
